

Making the Right Connections

Addressing the Power Challenge of the 21st Century

Thursday 2 May 2019

the
IDGTE
Technology Seminar
& 72nd Annual Luncheon

IDGTE's 2019 Technology Seminar and Luncheon is to be held at the Grange Tower Bridge Hotel. The day will commence at 10.00am with a technology seminar, followed by a 3-course luncheon and guest speakers in the afternoon.

The morning seminar will comprise a multi-stream programme covering a range of technologies and subject matter, so there will be something which is relevant to everyone's business.

The annual seminar and luncheon is well established as a key event in the calendar of the power and prime mover industries and is an occasion not to be missed. Book your place now and take the opportunity to catch up on the latest technology developments and to hear and engage with internationally renowned speakers, plus the chance to network with other members, clients, colleagues and friends, old and new.

Principal Guest: Dr Susan Scurlock MBE, CEO & Founder of Primary Engineer

"If you were an engineer, what would you do?" Susan Scurlock had a vision to inspire young people to get involved with engineering from an early age. She has an amazing story to tell about pursuing that vision and her journey with Primary Engineer. Founded in 2005, Primary Engineer brings together teachers and engineers to engage primary and secondary school pupils with the world of engineering through projects mapped to the curriculum. A key part of the programme is the Primary and Secondary Engineer Leaders Award competition which saw over 37,000 (yes - thirty seven thousand) entries in 2018. Susan was awarded an MBE in the 2019 New Year Honours List for services to education and engineering. We are delighted to have her as our Principal Guest. Join us and let her inspire you to get more out of your engineering career!

Guest Speaker: Dallas Campbell, TV Science Presenter, Writer and Broadcaster

You will probably know Dallas Campbell from his many TV appearances including Bang Goes The Theory and The Gadget Show. His passion for popularising science and for investigating the weirder areas of life, the universe and just about everything, took him from a background in theatre and film work into researching, writing and presenting authored documentaries for television. Fearless, engaging and inspiring, he speaks about a wide range of topics including science, rockets and space – and, rather uniquely, brings his own space-suit with him! Dallas shares his experiences with wit and humour. *"Entertaining, engaging, fun and a very charismatic speaker"* are just some of the things people say about him.

Individual ticket price **£130** (+ VAT) Inclusive of admission to seminar and luncheon

An application form is overleaf, or is available from www.idgte.org
