THE 2019 OPERATIONAL REPORT INVITATION

IDGTE is delighted to have successfully completed the 2018 Operational Report covering the years 2015-2017. On behalf of the working group I pleased to invite you to submit a return for the 2019 Operational Report.

We are inviting all past contributors and new contributors to send in returns for reciprocating engines, gas turbines, combined cycle power plants and also renewable energy facilities for a twelve month period.

The IDGTE Operational Report provides analysis, guidance and benchmark performance indices to users of reciprocating engines, gas turbine plant and combined cycle power plants worldwide. This report has been in existence since 1923 and was formerly known as the Working Cost Report. The report relies upon the contributions of Users to ensure it is both comprehensive and statistically valid. We hope that you will be interested in continuing this work and submit a return for the IDGTE 2019 Operational Report to help make this a great success.

The Annual Operational Report is a unique compilation of data of value to organisations worldwide, including owners, operators, financial bodies, manufacturers and consulting engineers. The Operational Report is one of a number of technical papers presented and published by IDGTE annually. At its peak we have had over 30 countries represented in the previous reports with 166 power stations, 600 prime movers, and an installed capacity of around 2,500Mwe. Please help us to achieve this target by sending in your return.

All those contributing to the 2019 report will receive a copy of the full results as soon as they have been compiled and a copy of the report when it is issued. Contributors will also receive an invitation to join the Ops Report discussion meeting to be held in 2020.

Please visit the web site and download the guidance notes and forms. Returns may be sent in at any time. We request that these are sent in by 30 November 2019. The guidance notes and return forms together with a sample return are available to download from the IDGTE web site: http://idgte.org/operational_report.html

If you have any query or would like assistance, or more time to submit, then please contact the IDGTE office in Bedford, United Kingdom and we will be delighted to help.

Yours faithfully,

Ronald Hunt

On behalf of IDGTE Operational Report Working Group
