

The Ten Point Plan for a Green Industrial Revolution

A series of webinars hosted by IPowerE

Wednesdays 10.00am to Noon

15th September 2021, 13th October 2021 and 17th November 2021

The IPowerE is a leading independent international forum for networking and promotion of knowledge in the field of power and energy and we have lined up an impressive set of presenters on the very topical subject of the UK's Ten Point Plan for a Green Industrial Revolution

15th September 2021

Yonna Vitanova - Senior Policy Analyst - RenewableUK

"Development (Evolution) of the UK Electricity System to meet the requirements of Zero Carbon"

National Grid Gas - Hydrogen in the gas networks:

Lloyd Mitchell (Hydrogen Engineering Lead, FutureGrid) and Suki Ferris (Hydrogen Gas Market Plan Lead) from National Grid Gas Transmission (NGGT) will provide an overview of several gas network hydrogen projects in development, including a deep dive into FutureGrid and Project Cavendish

13th October 2020

Felix Ritchie - Business Manager - Frazer-Nash Consultancy Ltd

"A Consultants Perspective on the Ten Point plan"

Sukhbinder Singh - Senior Consultant - Frazer-Nash Consultancy Ltd

"An overview of Advanced Nuclear Technologies and the contribution they can make to achieving Net Zero"

17th November 2020

Prof G Hughes - School of Economics - University of Edinburgh

"Ten Point Plan and Market Intervention" Second Speaker to be confirmed
